**LOCATION:** TDOT#24009-3216-94, SR76, Wolf River  
Fayette County 35.0708/89.3944

**WATERSHED DESCRIPTION:** The North Fork of the Wolf River watershed drains a wide area of southwestern Tennessee and includes numerous expanses of bottomland hardwood wetlands. The channel varies from 30 to 40 feet wide and has a silty sand substrate. The area surrounding the impact site is large contiguous wetlands.

**PROJECT DESCRIPTION:** The applicant proposes to replace two existing bridges with 210 ft. of 3-span concrete girder bridge and 350 ft. of 5-span concrete girder bridge. The replacement would involve permanent impacts to 1.81 acres and temporary impacts to 3.80 acres of wetlands. The temporary impacts would be mitigated by returning the affected area to original elevation and replanted with native trees. Debiting, at a 2:1 ratio, 3.62 acres of available credit from the Wolf River Wetland Mitigation Bank, would mitigate permanent impacts.

In accordance with the Tennessee Antidegradation Statement (Rule 1200-4-3-.06), the division has determined that the proposed activity will not result in degradation to water quality.
